Open to relocation: Buenos Aires, Argentina · Open to remote

Bilingual (native Spanish / fluent English) UX/UI designer who builds. Formally trained through a UX/UI Design Certificate (Nuclio Digital School, Barcelona) and self-taught in front-end development, I design and ship real working products, not just mockups. Three years in e-commerce and logistics taught me to diagnose problems fast, simplify complicated processes, and communicate clearly across languages and teams, skills that carry straight into UX work.

SELECTED DESIGN & DEVELOPMENT WORK

Break Board, Designer & Developer 2025 – 2026

- Designed and shipped a live internal web app (HTML, CSS, JavaScript, Firebase) now used daily by my team to manage break scheduling, including real-time slots, countdowns, Kiosk Mode, history log, and CSV export.
- Owned the full process end-to-end: research, wireframes, high-fidelity UI, front-end build, and deployment.

Freelance Graphic & UX/UI Designer 2022 – Present

- 5+ clients across the U.S. and Argentina, including Abruzzo Bar (Houston, TX), Artesplash (Buenos Aires), and Gusto Pasta, delivering logos, brand identity, apparel design, event menus, and illustrations.
- Manage full client relationships independently, from concept through final delivery.

PROFESSIONAL EXPERIENCE

E-Commerce Supervisor, Whole Foods Market Sep 2025 – Present

Dedham, MA

- First point of contact for operational and technical issues; troubleshoot system problems in real time to protect order accuracy and fulfillment speed.
- Monitor performance data to identify trends and inefficiencies; collaborate with store leadership on escalations.

E-Commerce Team Trainer, Whole Foods Market Jun 2025 – Sep 2025

Dedham, MA

- Designed and delivered onboarding/systems training in English and Spanish, translating complex software into clear, step-by-step guidance for new hires.
- Documented best practices to keep team-wide system usage consistent and accurate.

E-Commerce Shopper, Whole Foods Market Oct 2024 – Jun 2025

Dedham, MA

- Fulfilled online orders using internal order management systems while maintaining quality standards through digital verification tools and direct customer support.

Warehouse Logistics Lead, JAS Contract Logistics Feb 2023 – Sep 2024

Chicago, IL

- Managed daily operations via Warehouse Management Systems (WMS); oversaw inbound/outbound logistics and identified system discrepancies.
- Coordinated cross-functional teams to consistently meet service-level targets.
