Bilingual UX/UI designer (native Spanish, fluent English) who also builds. I design in Figma and code in HTML, CSS, and JavaScript, so my ideas reach real people, not just a mockup. My first shipped product, Break Board, replaced the paper sheets my team kept losing. Trained at Nuclio Digital School and self-taught in front-end. Three years in e-commerce and logistics taught me to spot where a process breaks and explain the fix clearly, in either language.

SELECTED DESIGN & DEVELOPMENT WORK

Break Board, Designer & Developer

2025 – 2026

- Replaced the paper sheets my team used to log breaks, and kept losing, with a live web app (HTML, CSS, JavaScript, Firebase) that my team used every day. Employees get fewer steps and a countdown; managers see slots in real time and close out the night with one button.
- Did it all solo: research, wireframes, high-fidelity UI, code, and launch. Also built a PIN-locked Kiosk Mode, a manager history view, and CSV export.

Luquita, UX/UI Designer

2024 – 2025

- Personal-finance app for young adults, built with a team for Nuclio's Demo Day. I handled UX research, user flows, wireframes, high-fidelity screens, and the interactive Figma prototype.
- In user testing, people found it approachable, and simulating scenarios gave them confidence to take real financial steps.

Freelance Graphic Designer

2022 – Present

- Designed logos, brand identities, apparel, event menus, and illustrations for 5+ clients in the U.S. and Argentina, including Abruzzo Bar (Houston), Artesplash (Buenos Aires), and Gusto Pasta.
- Ran every project myself, from the first conversation to the final files.

PROFESSIONAL EXPERIENCE

E-Commerce Supervisor, Whole Foods Market

Sep 2025 – Sep 2026

Dedham, MA

- The team's go-to when ordering systems acted up. Fixed problems in real time so orders stayed accurate and went out on time.
- Watched performance data for slowdowns and worked with store leadership to fix what I found.

E-Commerce Team Trainer, Whole Foods Market

Jun 2025 – Sep 2025

Dedham, MA

- Created and taught onboarding and systems training in English and Spanish, turning complicated software into simple step-by-step guides for new hires.
- Wrote down best practices so the whole team used the systems the same way.

E-Commerce Shopper, Whole Foods Market

Oct 2024 – Jun 2025

Dedham, MA

- Fulfilled online orders through internal systems, keeping quality high with digital checks and direct customer support.

Warehouse Logistics Lead, JAS Contract Logistics

Feb 2023 – Sep 2024

Chicago, IL

- Ran daily warehouse operations in WMS, oversaw inbound and outbound freight, and flagged system discrepancies.
- Coordinated teams across departments to consistently hit service targets.

EDUCATION

Master in UX/UI Design

Nuclio Digital School, Barcelona, Spain, 2024 – 2025

Capstone: Luquita, a personal-finance app built as a team project (see above).

High School Diploma, Tourism

Colegio Reconquista, Buenos Aires, Argentina

SKILLS

UX/UI Design

Figma

User Research

Wireframing & Prototyping

Usability Testing

Accessibility

HTML / CSS / JS
